Mission Statement

The Narragansett High School Multimedia Center supports the Mission Statement and curriculum of Narragansett High School. The library strives to provide a diverse and balanced array of print and non-print materials which reflect the educational needs of the Narragansett High School community.

The library is responsible for providing physically and intellectually a balanced collection of educational materials in a variety of formats which will stimulate creative and critical thinking as well as offer information for recreational and independent study.

Efforts are made to educate library users to be discerning and ethical in their selection of materials. Both formal and informal instruction ensures that students and staff are effective and appropriate users of ideas and information.

The Narragansett High School Multimedia Center supports the Library Bill of Rights and The Freedom to Read Statement as approved by the American Library Association.

Approved January 1998
