Climate Investigation

Each group member will be assigned one of the topics we discussed in class.

Some members will work in pairs.

Use books, online information, encyclopedias, and magazines.

As a group, go through all the information collected to determine if any information is missing.

Using the information you collected, create a poster to teach the rest of the class about your climate.

The poster should include:

★ A title on the top of the poster with the name of the climate
★ One picture of a region where the climate can be found
★ A map of the globe showing where the climate is located
★ A drawing or picture of an animal, vegetation, and natural resource from the region
★ Answers to each of the questions
★ Correct spelling
★ Neat handwriting
★ Organized neatly
★ Proper punctuation
★ Capitalization of proper nouns
★ The name of each group member on the back of the poster

*Each group member will present his or her information to the class during the group poster presentation.
