Idominos Rex
By Jackson H.
Once there was a lab and they were researching dinosaurs. The scientists designed one new species of dinosaur.
They called the dinosaur Idomino Rex. The dinosaur was big. He was 50 feet tall. The scientists built a cage 100 feet tall for Idomino.
The scientists checked every day on the beast. The beast tricked them and made claw marks to make it look like he escaped, but he was really hiding from them. He was planning his real escape for the next day.
