Library Mission Statement: The mission of the Tiverton School Department Library/Media program is to support the curriculum and to empower the school community with information literacy skills in order to foster life-long learning and active participation in our society. (from TPS Library Media Curriculum 6/01)

Library Policies
1.4.1: The Tiverton High School Library Media Center serves a population of students, grades 9-12, the building staff and faculty, as well as the district administrative offices.

1.4.2: The THS LMC is part of the RILINK consortium and fills interlibrary loan requests daily. The LMC does not frequently receive requests for services outside of this clientele, but has provided resources to parents and alumni on occasion. The physical space of the LMC is used frequently for school and community meetings and presentations.

1.4.3: The THS LMC currently offers services to individual students and staff, using the library on an independent basis, and includes computer lab use, material checkout, photocopying, scanning, laminating, and the use of audio-visual equipment. Also, the LMC serves classes and provides research instruction as well as computer lab use.
